- *1: This is the heat resistance temperature of the SUS310S material.
- Values in chart are for reference only. They are not guaranteed
- When heated to 700 deg C, tensile strength drops approximately 60% and proof stress drops approximately 40%.
- Make sure to carry out tests under the same condition of actual use in advance to confirm safety.

- Compared to SUS304, SUS310S has excellent heat resistance, oxidation resistance, and nitric acid resistance compared to SUS304.
- Austenitic series stainless steel with high Ni content, which is effective for corrosion resistance and high temperature characteristics.
- Use in combination with **SNSJ** Socket Head Cap Screw (SUS310S) → P.xxxx
- Cleanroom wash and cleanroom packing are completed. → P.xxxx

Application

FPD production equipment, semiconductor devices, nitric acid plants, and aquatic applications
